
PRODUCT CATALOG (G version)

Spring, 2019

Monarch Green, Inc. currently offers “Green” products as made from 100% recycled, biodegradable materials sourced within the U.S.A. They are also assembled and manufactured in the U.S.A., or within Trade Agreements Act (T.A.A.) compliance.

We take pride in our ability to design and manufacture special-purpose, customized products tailored to meet the unique requirements of individual customers. Our patented products are the result of such efforts and they represent cutting-edge, state-of-the-art technology. These products are sold under our OILINATOR[®] brand and they include our bilge boom, pool and spa saver mouse, and ground protector.

Our newest patent-pending product is our innovative sandless sandbag which we market under the FLOODBAG[™] brand. We have created a 4-minute online product demonstration which can be viewed via the following link: myfloodbag.com

We also offer a full range of top quality products within the “Oil-Only” and “Universal” application categories including: Sorbent Mats, Pillow Mats, Containment Booms, Sorbent Socks, Spill Kits, Mat Rolls, and Oil Drum Toppers.

Cel-Fiber[®] is our top-selling, extremely cost effective, universal bulk sorbent product. It has an industry-best absorbent capacity that is head-and-shoulders above rival products. It has been successfully reviewed by the U.S. Environmental Protection Agency (“E.P.A.”), and the stringent California Department of Fish and Wildlife for safe use on both land and water. It is therefore environmentally safe and “Eco-Friendly”.

FLOODBAG™ SANDLESS SANDBAGS

Before contact with water

After contact with water

DESCRIPTION

Eliminates the need for old-fashioned, conventional sandbags! Each patent-pending FLOODBAG™ is pre-filled at the factory with a proprietary blend of biodegradable sorbent material that is equally effective from both fresh water AND salt water contact. Each FLOODBAG™ also contains special material that absorbs oil and other petrochemicals. The durable UV-protected outer casing is made of rugged, eco-friendly polypropylene. Each FLOODBAG™ initially weighs seven pounds with overall dimensions of 14" x 26" x 2". Once FLOODBAG™ comes in contact with water it swells and gains weight in minutes to the general size, appearance and functionality of typical sand-filled sandbags but eliminates 30-40 pounds of sand!

- Eliminate the expense of buying sand and renting the requisite delivery vehicles.
- Sharply reduce the labor-intensive expense associated with filling and deploying each sandbag.
- Drastically reduce the costs associated with post-event sand bag removal.
- Can be readily offloaded from the delivery vehicle and quickly put in place with minimal physical effort.
- Save precious time and labor, and reduce worker injury risk by eliminating the need to fill sandbags.
- Easy to handle, store, and transport.
- Helps reduce petrochemical water contamination.
- Manufactured with 100% U.S.A. eco-friendly recycled sorbent materials.

401 – 600 Super Sack	SKU: FLOODBAG
601 - 1000 Super Sack	SKU: FLOODBAG

CEL-FIBER[®] UNIVERSAL 100 GALLON CAPACITY SORBENT BALE

SKU: OFC1BALE 1 BALE PER CASE

This extremely popular Universal sorbent is easy to ship, store, and use. It will easily and safely absorb 100 gallons of your oil or water based spills, including:

Diesel fuel * Jet Fuel * Gasoline * Hydraulic Fluid * Coolant * Transmission Fluid

Solvents * Paint * Bleach * Cooking Oil * Bodily Fluids * Pesticides and other liquids

Provides an amazing **TWO GALLONS PER POUND** absorption capacity without the health risks associated with silica dust! This fast acting, compact 50-pound bale measures only 10 x 16 x 34 inches, yet it has more absorbent capacity than twenty 50-lb bags (1,000 pounds) of clay / kitty litter.

CEL-FIBER® UNIVERSAL 8 GALLON CAPACITY SORBENT IN A 5 GALLON BUCKET

SKU: CAC04LBCF 1 BUCKET PER CASE

This extremely popular Universal sorbent is also available in a handy, easy-open, reusable 5 Gallon bucket with a sturdy carrying handle. Each bucket contains 4 pounds of Cel-Fiber™ with an absorbent capacity of up to 8 gallons. The rugged, heavy gauge, weatherproof plastic bucket keeps the contents dry in all weather conditions and is therefore ideal for outdoor use. The buckets are easy to ship, store, and use – particularly in emergency situations where rapid deployment and response time is critical. The buckets may also be used as a convenient receptacle for the fully-saturated Cel-Fiber™ once the spilled substance has been cleaned up.

CEL-FIBER[®] UNIVERSAL ABSORBENT PELLETS

SKU: OCFP1BAG

1 BAG PER CASE

This easy-to-use Universal sorbent product is a pelletized version of the Cel-Fiber[®] technology and it's packaged in a 20-lb EZ-Open, see-through plastic bag. Use of this product avoids the health risks associated with silica dust! The pellets within this compact 20-lb bag absorb up to 5 gallons which exceeds the absorbent capacity of a much larger 50-lb bag of clay / kitty litter -- so it takes up less storage space, it's easier to handle and less expensive to ship. This truly UNIVERSAL technology absorbs oil and water-based spills including diesel fuel, jet fuel, gasoline, hydraulic and transmission fluid, solvents, pesticides, bleach, coolant, cooking oil, paint, bodily fluids and much more.

OILINATOR[®] BILGE BOOM-ULTRA HIGH CAPACITY 10" X 18"

SKU: NVBBS10X18HD

30 PER CASE

The OILINATOR[®] Oil-Only High-Capacity Bilge Boom absorbs up to 2 Gallons of oil, diesel fuel, jet fuel, gasoline, hydraulic fluid, transmission fluid, solvents & more. It is highly effective on both land and water. It is REUSABLE, and delivers the best bang for the buck. Its innovative, rectangular shape ensures that half of its surface always remains in contact with the intended surface area for rapid and efficient absorption of petrochemicals. This also fits in most yard drain sumps and can be used as a pre-treatment device to efficiently and cost-effectively capture contaminants, debris, silt, and hydrocarbons (including oil sheen) from being washed into storm drains, thus limiting environmental damage and risk of fines. IT WILL NOT SINK even when fully saturated! It includes a leash for tethering and easy retrieval. The handy grommets enable multiple units to be easily linked together to fit any requirement or configuration. This is a "Green" product, proudly made using 100% recycled American sorbent material successfully reviewed by the stringent U.S. E.P.A. and California Dept. of Fish & Wildlife. Non-toxic and won't harm the environment.

OILINATOR® POOL & SPA SAVER MOUSE®

SKU: PSM1CASE

24 UNITS PER CASE

Saves money and sharply reduces the need for potentially harmful chemicals and enzymes in pools and spas using Monarch Green's patented technology! Made with environmentally friendly 100% recycled American sorbent material. Tether it by its twist tie tail to the bottom of the pool skimmer basket and it instantly goes to work to absorb body-hair-tanning oil, and sun screen from pool & spa water circulating through the pool's filter system. This MOUSE helps pool professionals and owners save hundreds to thousands of dollars each month by reducing and even eliminating the amount of various enzymes and chemicals normally used while also extending pool service intervals and filter life. Keep your pool and spa sparkling clean with no hassles in a money-saving, healthier, GREEN way!

OILINATOR[®] PAVEMENT AND GROUND PROTECTOR

SKU: OPPICASEHD 36 Units per Case

Monarch Green designed and patented this innovative all-weather, reusable product. It absorbs up to two quarts of oil, diesel fuel, jet fuel, gasoline, hydraulic fluid, transmission fluid, and solvents.

The first three layers of this 15" x 18" protector are made of special sorbent materials and the fourth layer is made from heavy duty flexible plastic sheeting to stop any material from staining or contaminating the protected surface once the product has become fully saturated. The plastic sheeting has an opening at one end so that any weighted material (gravel, sand, rebar, etc.) can be placed within to secure it in place during windy conditions. A handy leash is also provided for easy retrieval from underneath vehicles and machinery.

FLAT BOOMS

These special 8-Gallon Capacity flat booms are the most efficient booms in the industry. They have a built-in advantage over their round counterparts in that their flat shape continually exposes a much greater surface area to the spill -- which results in faster, and more efficient absorption. As an added bonus, the inherent flexibility of the flat configuration enables it to be easily coiled for compact storage in limited spaces! The sturdy metal rings on each end enable multiple booms to be readily linked together to meet any requirement.

The booms are made from a proprietary blend of 100% recycled polypropylene material and are manufactured in the U.S.A. Since the booms are equally effective on either land or water, they are ideal for both land and marine use.

The Oil-Only version of the boom rapidly absorbs oil, diesel and jet fuel, gasoline, hydraulic and transmission fluid, solvents & more. It will not sink even when fully saturated. The Universal version will also absorb all of these fluids in addition to: water-based fluids, pesticides, bleach, coolant, cooking oil, paint, bodily fluids and more.

OIL-ONLY

SKU: 06X10OOCASE 6" x 10" Flat Boom 4 / Case

UNIVERSAL

SKU: 06X10UNICASE 6" X 10' Flat Boom 4 / Case

PILLOW MATS

A unique feature of these pillows is their ability to retain large quantities of liquids once absorbed. They are an excellent product for placing under machinery or in workshop areas to prevent leaks or spills from spreading. These flexible pillows fit into tight spaces and they are made with a strong spun-bond polypropylene outer fabric.

OIL-ONLY

18" X 18" X 2" SKU: MGMONANEW19L1818 SPUN BOND 16 / CASE

UNIVERSAL

10" X 10" X 2" SKU: MGPIL204L1010 SUPER ABSORBENT FLAKE 40 / CASE

HAZMAT

18" X 18" X 2" SKU: MGMONANEW21L1818 SUPER ABSORBENT FLAKE 16 / CASE

ROUND CONTAINMENT BOOMS

Monarch Green offers round containment booms for oil-only applications. The booms are ten feet in length and are available in either 5-inch 10-inch diameter. The Booms feature all-in-one construction which produces exceptional strength, prevents twisting, and resists snagging on debris. They can also stretch without failing. The booms include end rings and snap hooks on either end for quick and easy configuration to any desired overall length. Rapid deployment is an added bonus

5" X 10' SKU: MGPS-BOOM510510-S SOCK-IN-NET BOOM 4 / CASE

8" X 10' SKU: MGPS-BOOM810810-S SOCK-IN-NET BOOM 4 / CASE

SORBENT SOCKS

Monarch Green currently offers a variety of Sorbent Socks for oil-only, and universal applications. All of these top-quality socks feature a tough, durable spun-bond outer sleeve. The absorbent core is secured into the sleeve at each end with a durable plastic clip. This is an excellent product for placing around leaking machinery or in workshop areas to prevent leaks or spills from spreading.

OIL-ONLY SOCKS

3" X 4' SKU: MGPS-OS-40-SB BONDED MELTBLOWN POLYPROPYLENE 40 / CASE

3" X 8' SKU: MGPS-OS8-20-SB SPUN-BOND MELTBLOWN POLYPROPYLENE 15 / CASE

UNIVERSAL SOCKS

3" X 48" SKU: 7GSU3X4USCASE 40 / CASE

3" X 4' SKU: MGPS-US4-40-SB SPUN-BONDED SUPER ABSORBENT FLAKE 40 / CASE

3" X 8' SKU: MGPS-US8-20-SB SPUN-BONDED SUPER ABSORBENT FLAKE 20 / CASE

MAT ROLLS

Monarch Green provides an extensive array of premium grade Mat Rolls which vary in thickness, length, width, sorbent material, absorbent capacity, and method of manufacture. They are available in Oil-Only, Universal, and Hazmat applications. These mats absorb leaks or spills and they are an excellent choice for general maintenance and clean-up.

OIL-ONLY MAT ROLLS

57" X 100' SKU: MGMAT4650CF RAILROAD MAT 1 / CASE

UNIVERSAL MAT ROLLS

30" X 150' SKU: MGMAT462F-150 SINGLE WEIGHT 1 / CASE

30" X 150' SKU: MGMAT137F-150 MEDIUM WEIGHT HI-SORB 1 / CASE

36" X 100' SKU: MGMAT22336100 MEDIUM WEIGHT POLY BACK 1 / CASE

36" X 150' SKU: MGPS-RRUG15010 RAG RUG 1 / CASE

MATS

Monarch Green provides an extensive array of premium grade 15" x 18" sorbent mats which vary in thickness, sorbent material, absorbent capacity, and method of manufacture. They are available in oil-only, and universal applications. These mats absorb leaks or spills and they are an excellent choice for general maintenance and clean-up.

DRUM TOPPERS

Monarch Green offers a selection of premium quality 22" diameter Drum Toppers in both oil-only and universal versions. These toppers absorb leaks and drips on contact to eliminate aggravating drum top overflows and slip-and-fall risk situations

OIL-ONLY

These toppers absorb any hydrocarbon product including oil, solvents, and fuels.

SKU: ODTP25HD POLYPROPYLENE BLEND HEAVY WEIGHT 25 / CASE

UNIVERSAL

These toppers absorb petroleum-based liquids, plus water-based fluids including coolant, pesticides, bleach, cooking oil, paint, and much more.

SKU: UDTP25XHD SINGLE WEIGHT 25 / CASE

SPILL KITS

Monarch Green offers heavy duty Oil-Only and Universal Spill Kits in a variety of sizes and containers. Unlike others in our industry, we shun the common and misleading practice of referencing the size of the spill kit based upon the size of its container rather than on the actual absorbent capacity of the components within. In other words, we ensure that you actually get what you assume you're paying for. Our kits are comprised of premium quality components including sorbent mats, pillow mats, booms, socks, bulk sorbent material, safety goggles, gloves, and disposal bags. The amount of such components varies in accordance with the size of the kit.

OIL-ONLY SPILL KITS

These kits rapidly absorb oil, diesel and jet fuel, gasoline, hydraulic and transmission fluid, and solvents.

5.0 GAL	SKU: OSK05GALCHD	ZIPPERED VINYL CASE / CARRYING STRAPS	12 / CASE

REUSABLE FILTER BOOM

SKU: RFB09X10EACH

UNITS PER CASE: 1

Monarch Green offers this innovative, eco-friendly product in both an Oil-Only version and a Universal version. These 9" diameter booms are highly effective, reusable barriers which prevent silt, debris, oil, and other unwanted material from entering storm drains, construction areas, or other work areas. The booms are available in 4 foot and 10 foot lengths and they can be readily linked together via sturdy connector rings on either end. They are made from a proprietary blend of 100 % recycled polypropylene materials and they are made in the U.S.A.
